

Final Demos

✓ Published

 [Edit](#)

"Demo day" is scheduled for Monday December 17, 10am-3pm, in 6LE1 CEPSR. Because of limited time, there will be multiple teams scheduled for the same time slot, and Prof. Kaiser will rotate through the groups. This is the only time period that Prof. Kaiser will be available to see demos. The entire team does not need to be present. (The CVN team should make separate arrangements through the CVN IA.)

Please plan (human script) *two* demos.

The first demo should be targeted to Professor Kaiser, consisting of an "elevator pitch" explanation of your project (NO slides!) and a very brief demo, no more than five minutes total.

The second demo should be for your IA mentor. 15 minutes maximum. For this your team should more thoroughly demonstrate the full features of your system and allow your mentor to "test drive". Also show your mentor the documentation written for your project, now included in your github repository. You do not need to demonstrate CI again unless there was some major change. It is ok if this demo occurs before, during or after the official "demo day" that Prof. Kaiser attends.

The only thing you need to submit, in the text entry box, is the (approximate) days/times when:

1. Your team showed your demo to Prof. Kaiser and the names and unis of which members of your team who attended.
2. Your team showed your demo to your IA mentor, and the names and unis of which members of your team who attended. These do not need to be the same people who attended the demo with Prof. Kaiser.

Points 20

Submitting a text entry box
