

# Implementation (and Demo): Team Assignment 3

 Published

 [Edit](#)

This is a team assignment.

Implement the first iteration of your application. The first part of the prose for this assignment should be very short: Describe challenges that arose during the implementation effort, if any, and indicate which pair was responsible for what parts of the implementation.

Schedule a demo with your IA team mentor before the deadline for this assignment. Plan for about 15-20 minutes. The demo itself only needs to be about 5-10 minutes, but you should allow time for discussion with your mentor. Your entire team should attend if possible. (The CVN team should arrange online screen sharing to present their demo.) **If your demo has not yet occurred before the deadline for this assignment, submit a stub for the assignment on time anyway and include a note at the top saying you have not yet shown your demo to your team mentor. Then submit again afterwards, removing that note, adding the missing content and highlighting any other revisions.**

After the demo, the second part of the prose submitted for this assignment should describe what you were able to demo and record any problems that arose, any recommendations from your mentor, etc.

Deposit your entire codebase, including any test cases, configuration files, scripts, data sets, etc. in your git repository. Tag the repository to clarify which revisions of which files contributed to the demo. (You should keep everything in git all along, rather than developing offline and then depositing only when required for assignments, but its important to tag which revisions contributed to which assignments so that version of the project can be retrieved and rebuilt.)

Each team should submit a single file, i.e., one member should submit. The name of your file should include your team name, and the contents of the file should also include your team name. Include instructions for accessing your git repository as part of the file submitted on canvas. Do not submit any code on canvas (or piazza)!

**Points** 10

**Submitting** a file upload

**File Types** doc, docx, pdf, txt, xls, and xlsx
