# Assignment T7: Demo Day

"Demo day" will be on Monday December 19th, on Zoom, between 10am and 4pm with some breaks.   You can attend all day if you want, but you are only required to attend your own team's demo.  Your team Mentor is welcome but is not required to attend.

Your demo should be no more than 5 minutes long and targeted to the instructor and the other students in the class, not to your team Mentor.  Do not assume your audience is familiar with your project.  The timeslots are 10 minutes so you can briefly describe what your server does and get your server started up with screen sharing.

Start the demo slot by putting something on the screen showing your team name and the names of all team members (ideally this would also show photos of all team members); otherwise, **_NO SLIDES_**.  Your demo should showcase your server's API somehow; you can do this by showing your client interacting with your service's API, or use POSTMAN or some other API tool.

Every team should sign up for one available 10-minute timeslot on **this spreadsheet** ⤵ **(https://docs.google.com/spreadsheets/d/1DvJj4XvhhTeodiiw_18SNqwWoU2KiZFGmZzpof5QUfs/edit?usp=sharing)** .  On the signup sheet, include both your team name and your Mentor's name.  All demos must be live (on zoom) and all team members are required to attend their team's demo but Mentors are not required to attend.   Do not overwrite another team's timeslot and do not overwrite "NOT AVAILABLE".

The Zoom link for demo day is available in "zoom class sessions" on courseworks.

No submission is required besides signing up on the signup sheet.

Grading is officially complete/incomplete, but the instructor's observations during the demo may affect differential grading of the team project.  Thus it would be wise to make sure every team member participates in the demo.
